

The Blackhawk Agility AWT (All-Weather Traction) is built to tackle all four seasons with confidence. Its aggressive asymmetric tread pattern offers unbeatable grip and control in both wet and snowy conditions. The advanced rubber compound stays flexible in freezing temps, ensuring top performance year-round. Perfect for drivers who face occasional snow or cold, it combines the handling of a performance all-season tire with the traction of a winter tire. Certified with the Three-Peak Mountain Snowflake (3PMSF), it's ready for winter. From snow to heavy rain or scorching summer roads, this tire delivers comfort, quiet rides, and relentless grip—whatever the forecast is calling for. Blackhawk Agility AWT – Tame every season.

Asymmetric all-weather tread design with multi-angled siping per tread block effectively enhances traction and handling year-round. Four wide circumferential grooves, along with lateral shoulder grooves, enhance water evacuation and maximize the tread's footprint for optimal road contact, ensuring better traction in wet conditions.
